

Eyeliner Procedure After Care

DAY OF PROCEDURE

-Do not touch the eyes. You may ice the eyes by applying ice over a clean cloth. Do not apply ice directly on skin.

-You may wash before bed with a gentle soap or cleanser. After washing allow to dry, do not apply ointment until they feel tight and dry.

-Your eyes may be swollen the day after the procedure. This is a normal reaction: some clients swell more than others. Swelling should start going down and your eyes should be looking better by the end of the second day

-If the skin feels dry, you may apply a thin layer of ointment only to the crease or lid. Do NOT apply on eyeliner. Wash your hands before applying any ointment. Do not apply too much, as it can cause adverse reactions such as swelling. You may do this as needed throughout your healing to keep eyeliner from becoming too dry and flaking off.

DURING DAYS 1-7

-Wash AM/PM and allow to dry 10 minutes before applying ointment. Apply ointment 1-2x per day as needed.

-Avoid water (For the PMU area), no sweating, saunas, lakes, pools, oceans or tanning. Do not stand with eyes directly in the shower stream.

-Please wear a hat or sunglasses if you are outdoors.

-Do NOT pick or peel any scabs or flakes, this can cause scarring and remove pigment.

-Do not use any ointments other than those listed above.

-Do not use eyelash serums or extensions for a minimum of 4 weeks after the procedure.

-When you begin wearing mascara, start with a new tube.

-Touch up is scheduled 8-10 weeks after your appointment to ensure the skin is fully healed.
